

Independent Internet Number Resources – Contractual Relationship Changes between sponsoring LIR and End User

RIPE NCC

Document ID: ripe-516

Date: March 2011

Obsoletes: ripe-475

Abstract

This is a procedural document that describes the steps to be taken when there are changes in the contractual relationship between the End User of independent Internet number resources and the sponsoring Local Internet Registry (LIR). The document also describes the scenarios in which the RIPE NCC may de-register independent Internet number resources.

This document does not describe the procedure applicable to contractual relationship changes for independent Internet number resource users who have signed a contract with the RIPE NCC.

[4.3 Contract Expired and Not Renewed / Ceased and Not Transferred](#)

1.0 Introduction

In October 2008, the RIPE Community accepted a policy change which states that a contractual relationship must be established between an End User and a sponsoring LIR or the RIPE NCC before the End User can receive independent Internet number resources.

In order to fulfil its mandate of manager of independent Internet number resources, the RIPE NCC requires End Users and LIRs to inform the RIPE NCC in case of changes to their contractual relationship.

The procedures listed in this document are subject to RIPE policies.

2.0 Ownership and Legal Name Changes

The RIPE NCC requires Sponsoring LIRs to maintain a proper registration of End User's legal organisation changes with the RIPE NCC.

2.1 End User Organisation Changes Ownership

If the ownership of the organisation changes but the legal operating name is continued, the RIPE NCC does not have to be notified.

2.2 End User Organisation Changes Name

When an End User that has been assigned independent Internet number resources changes its legal operating name, the RIPE NCC must be notified.

In all cases, a new contract must be signed between the renamed End User organisation and the sponsoring LIR in order to guarantee a legitimate handover of the existing rights and obligations.

A copy of this contract, a revised extract of the Trade Register and proof of change from an authorised person must be provided to the RIPE NCC.

3.0 Transfer of Contractual Relationship

If the contractual agreement between the End User of independent Internet number resources and the sponsoring LIR ceases, for any reason, the contractual changes must be communicated to the RIPE NCC.

3.1 Transfer between Sponsoring LIRs

If the End User decides to change sponsoring LIR, this change must be communicated to the RIPE NCC.

The request must come from either the current or the new sponsoring LIR. The RIPE NCC will need confirmation from both LIRs before it can proceed with the transfer, unless the current LIR is closed or in the process of being closed.

The RIPE NCC will finalise the change after it receives a copy of the new End User Assignment Agreement and extract of the Trade Register. The new agreement will replace the old agreement.

3.2 Transfer from Sponsoring LIR to the RIPE NCC

If the contractual agreement between the End User of independent Internet number resources and the sponsoring LIR ceases and the End User wants to enter into a contractual relationship with the RIPE NCC, the End User will have to follow the application procedure to become a Direct Assignment User, signing the End User Assignment Agreement with the RIPE NCC and paying the Administration and first Maintenance Fee.

At this point, the RIPE NCC will need confirmation from both the End User and the sponsoring LIR before it can proceed with the transfer of the contractual relationship of independent Internet number resources, unless the LIR is closed or in the process of being closed.

4.0 De-registering of Independent Internet Number Resources

This section is replaced by the RIPE NCC organisational document “[Closure of LIR and Deregistration of Internet Number Resources](#)”.

4.1 Closure of Sponsoring LIR

This section is replaced by the RIPE NCC organisational document “[Closure of LIR and Deregistration of Internet Number Resources](#)”.

4.2 Violation of RIPE Policy, Law or Contract

This section is replaced by the RIPE NCC organisational document “[Closure of LIR and Deregistration of Internet Number Resources](#)”.

4.3 Contract Expired and Not Renewed / Ceased and Not Transferred

If the contract between the sponsoring LIR and the End User of independent Internet number resources has expired and has not been renewed, or has ceased for any other reason, the End User has a maximum of 90 days to sign a contract either with a new sponsoring LIR or with the RIPE NCC.

The timeframe for this case is described in Section 4.1.1 - Deregistration Timeframe.
